

# LASER HARP EXPERIENCE

The Laser Harp is not only a spectacular performance, it is also a futuristic interactive and artistic installation that allows the audience to experience the incredibly magical emotion of playing light!

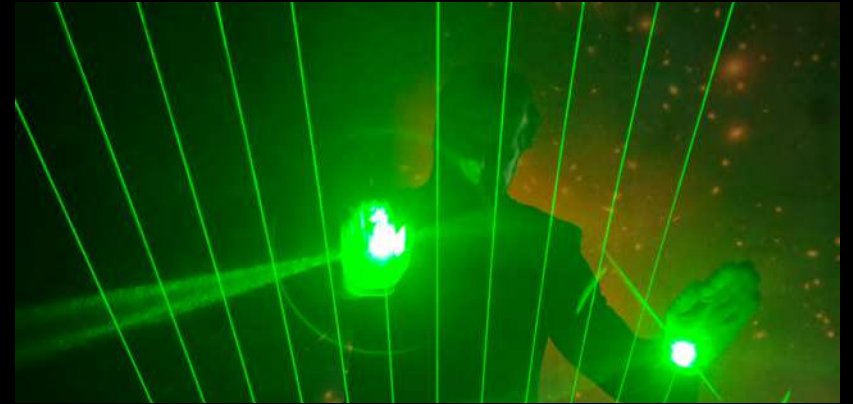

After the Live performance, this extraordinary musical instrument is available to be played by the guests attending the event.

The Light Harp is very versatile and lends itself to experimentation. This experience captivates the guests, connoting and enhancing a product launch event as a whole, with unique emotions and feelings. It arouses amazement, as well as pleasure, when you touch the luminous rays, experimenting with the magic of playing Light.

With this interaction, the audience perceives how the most advanced technology can be used in the most extraordinarily creative and artistic way. In any location, historical or modern, the Laser Harp creates an atmosphere that is evocative, spectacular and utterly enchanting.

## TECHNICAL DESCRIPTION

- 220 volt electric socket.
- Audio system for sound diffusion (there is a possibility to be autonomous with the sound system but this needs to be checked in proportion to the event).
- Space required 3m x 3m.

It is important to note that a normal smoke machine (water vapour) will be used in the room to enhance the Laser display.

It is necessary to pay particular attention to the calibration of the smoke sensors, in the room where the Harp will be set up.
